The Markets are ready
growth for the Yocoy language guide with customers in >100 countries.

What we can do for the European economy and society:

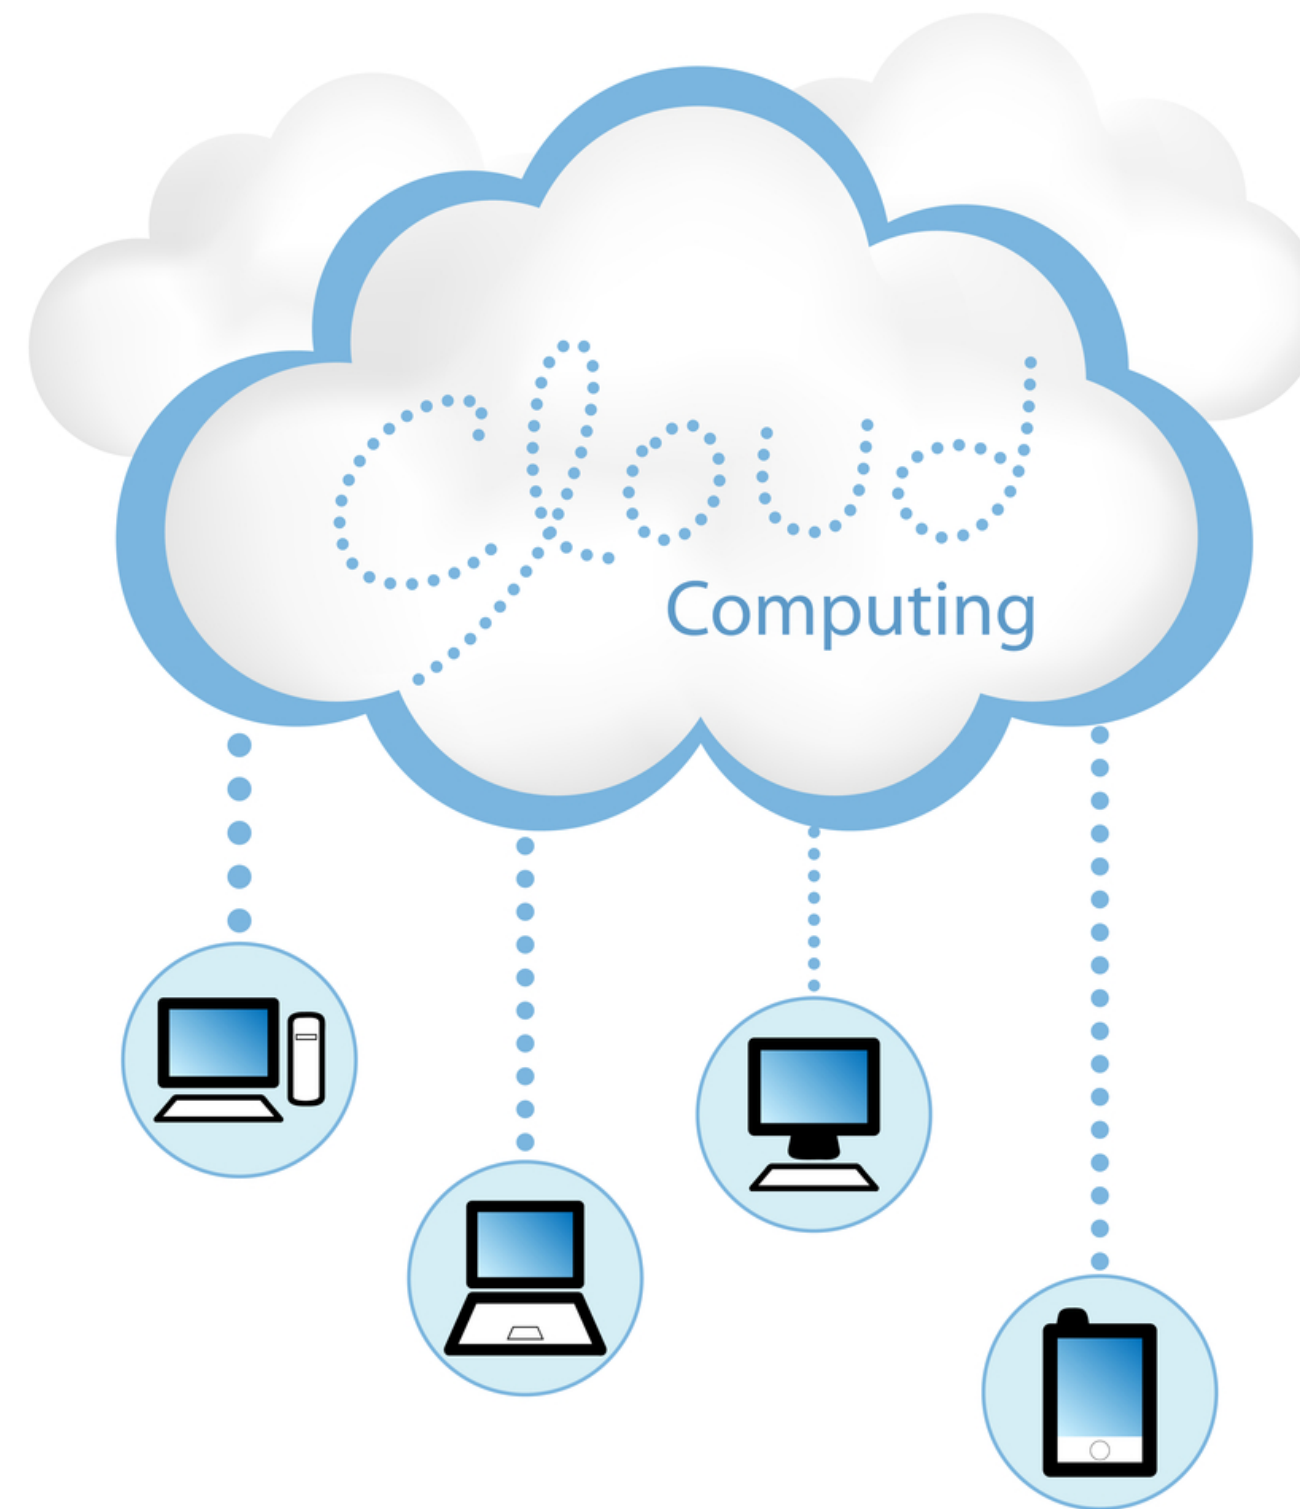

A web-based service platform for tourism with mobile crosslingual communication and information services

- Featuring European and relevant non-European languages
- Always correct translation and sufficient coverage by sublanguages in relevant situations such as hotel, restaurant, sightseeing, shopping, health, border, transportation, emergencies
- Developed, populated and maintained in cooperation with local tourism associations/agencies, tourism industries
- Convincing first version live and running 12 months after start of the project

Cloud-based Mobile Tourism Information Service Platform

Cloud-based Mobile Tourism Information Service Platform

- Tourism content management
- Cloud-based big data technologies
- Semantic Web technologies (Web 2.0 and Web 3.0)
- Multilingual Information Access
- Multimedia Information Retrieval
- Face-to-face crosslingual communication
- Mobile multimodal interaction
- Machine translation
- Speech recognition
- OCR technology

Mobile Multilingual Multimodal Multimedia
Information and Communication Service Platform
for Tourism
